## Up to 2 switching outputs

## Description:

EDS 8000 is an electronic pressure switch in compact design which is simple to adjust. Models with one or two transistor outputs (PNP or NPN) are available.

The switch points are set using the two keys and a four-digit display. During operation the switching position is indicated by either a red or a green backlight in the display.

For optimum adaptation to a particular application, the instrument has many additional adjustment parameters, e.g. switching delay times, N/O / N/C function of the outputs.

EDS 8000 is available in various pressure ranges between 0 .. 25 bar and $0 . .600$ bar.

The main applications of the EDS 8000 are to indicate pressures and limits in hydraulics and pneumatics, or any application where high switching frequency or constant switching accuracy would overburden a mechanical pressure switch.

## Technical data:

| Input data |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Measuring ranges | bar | 25 | 40 | 100 | 250 | 400 | 600 |
| Overload pressures | bar | 80 | 80 | 200 | 500 | 800 | 1000 |
| Burst pressure | bar | 200 | 200 | 500 | 1000 | 2000 | 2000 |
| Mechanical connection |  |  | G1/4 A ISO 1179-2 |  |  |  |  |
| Tightening torque, recommended |  |  | 20 Nm |  |  |  |  |

## Setting options:

All the terms and symbols used for setting the EDS 8000 as well as menu structure comply with the specifications of the German Engineering Federation Standard (VDMA 24574-1) for pressure switches. The EDS 8000 is easy and convenient to set up using the two buttons.

## Setting ranges for the switching outputs:

| Measuring <br> range <br> in bar | Lower limit of <br> RP $/ F L$ <br> in bar | Upper limit of <br> SP /FH <br> in bar |
| :--- | :--- | :--- |
| $0 \ldots 25$ | 0.25 | 25.00 |
| $0 . .40$ | 0.4 | 40.0 |
| $0 . .100$ | 1.0 | 100.0 |
| $0 . .250$ | 2.5 | 250.0 |
| $0 . .400$ | 4 | 400 |
| $0 . .600$ | 6 | 600 |
|  |  |  |
| Measuring <br> range <br> in bar | Min. difference <br> betw. RP and SP <br> \& FL and FH | Incre- <br> ment <br> in bar |
| $0 . .25$ | 0.25 | 0.05 |
| $0 . .40$ | 0.4 | 0.1 |
| $0 . .100$ | 1.0 | 0.2 |
| $0 . .250$ | 2.5 | 0.5 |
| $0 . .400$ | 4 | 1 |
| $0 . .600$ | 6 | 1 |

* All ranges given in the table can be adjusted by the increments shown.
SP = switch point
RP = switch-back point
FL = pressure window lower value
$\mathrm{FH}=$ pressure window upper value

## Additional functions:

- Switching mode of the switching outputs adjustable (switch point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.00 .. 99.99 seconds
- Display filter for smoothing the display value during pressure pulsations
- Pressure can be displayed in
bar, psi, MPa

## Pin connections:

| Pin | EDS 8446-1 | EDS 8446-2 |
| :--- | :--- | :--- |
| 1 | + U $_{B}$ | + U $_{B}$ |
| 2 | n.c. | SP2 |
| 3 | 0 V | 0 V |
| 4 | SP1 | SP1 |

## Dimensions:

## Model code:

## Mechanical connection

$4=$ G 1/4 A ISO 1179-2

## Electrical connection

6 = male M12x1, 4 pole (mating connector not supplied)

Output
1 = 1 switching output
$2=2$ switching outputs
Measuring ranges in bar
0025; 0040; 0100; 0250; 0400; 0600

## Modification number

000 = standard
NOO = version with NPN switching outputs

## Accessories:

Appropriate accessories, such as mating connectors and mechanical adapters, can be found in the Accessories brochure.

## Note:

The information in this brochure relates to the operating conditions and applications described.
For applications or operating conditions not described, please contact the relevant technical department.
Subject to technical modifications.
